SUMMARY

Frontend and creative developer who sweats the details of animation, transitions and interaction. Five years writing code, from React and TypeScript at a London studio to freelance builds in Next.js, Three.js and GSAP for clients in 12 countries.

SKILLS

Frontend: JavaScript, TypeScript, React, Next.js, HTML5, CSS3, SCSS, Material UI, Responsive design

Motion and interaction: GSAP, ScrollTrigger, Lenis, Lottie, Rive, Framer, Micro-interactions, Transitions, Loading states

3D and visual: Three.js, WebGL, Spline, Blender, Figma

Workflow: Git, GitHub, Azure DevOps, Scrum, Vercel

Webflow: Webflow, Webflow CMS, Webflow Interactions, Custom code embeds, Shopify integration

Scripting and automation: Python

EXPERIENCE

Freelance Creative Developer, Fiverr and direct clients

Remote | 07/2024 - Present

- 24 Fiverr reviews, 4.97 average rating, clients in 12 countries including the US, Mexico and Australia.
- Built custom sites in Next.js and React with Three.js, GSAP, Lottie and Lenis, owning the details: motion timing, transitions and performance.
- Turned Figma designs into responsive production builds across Webflow and custom code.
- Upgraded Angular and Capacitor for a client's iOS and Android apps and fixed their builds.

Front-End Developer, Maplin Studio

London, UK (remote) | 10/2022 - 07/2023

- Built front-end features in React, TypeScript, Material UI and SCSS, improving site responsiveness and code quality.
- Worked in Scrum with Git and Azure DevOps, shipping small, reviewable pull requests.

Web Developer Intern (Angular), Protech Logics

Rawalpindi, Pakistan | 08/2021 - 01/2022

- Fixed JavaScript and cross-browser issues, optimised UI performance and delivered responsive fixes in Angular.

SELECTED PROJECTS

Zuhayr Creative | Custom development | zuhayrcreative.vercel.app

- A fully custom site in Next.js and React. A Unicorn Studio 3D background, the logo drawn on like a signature with Lottie, Three.js, GSAP for the animation and Lenis for the smooth scroll.

SensaLab | Webflow development and 3D | sensalab.io

- Built with the Mexican design agency Brutal Brand: they designed it, I made it a live Webflow site, with Spline scenes, custom Three.js shapes and GSAP animation.

Pearl Towers | 3D and scroll animation | ptc-b4c1e3.webflow.io

- I modelled the client’s building in Spline and rendered it as an image sequence, then optimised the frames and played them on scroll with GSAP in Webflow — it reads as 3D without loading a 3D model.

EDUCATION

BS Software Engineering, Virtual University of Pakistan | 04/2022 - 2026 (in progress)
